## Education

**Kaduna State University.**

BSc. Computer Science

Kaduna state, Nigeria.

September, 2016 - August, 2021.

## Open Source Experience

**Acid UI**

Maintainer/Creator and Contributor

Kaduna state, Nigeria.

September, 2022 - Present.

**Skills:** Reactjs and Typescript.

- Conceptualized the architecture and purpose of the project from the ground up keeping maintainability and scalability in mind hence potentially increasing the success of the project by 200%.
- Networked with fellow developers on social media platforms like LinkedIn and twitter hence leading to a 200% increase in the number of adopters and contributors.

## Professional Experience

**Comuna**

Fullstack Engineer - Contract

Kaduna state, Nigeria.

April, 2022 - Present.

**Skills:** Reactjs, Typescript, Node.js, Express and MongoDB.

- Actively participated in requirement gathering which improved development speed and accuracy by 50%..
- Developed a mini library with React that reduced development time by 60%..
- Structured frontend by building in advanced performance optimization principles, hence increasing load time by 150%.
- Built a wrapper class around Fintech API for financial transactions hence reducing probability for security breaches by 300%.

**Medical Identification**

Frontend Lead - Full Time

Kaduna state, Nigeria.  
August, 2022 - Present.

**Skills:** Reactjs, Typescript, Next, Vue.js and Nuxt.

- Was vital in the decision making process in initiating a technology pivot after research which contributed to a 30% increase in load time and overall performance.
- Leading the frontend team in rebuilding the product following best practices, reducing load time, improving maintainability and smooth transitioning of UI states hence improving user experience by 100%.

**Greysoft Technologies**

Fullstack Engineer - Full time

Kaduna state, Nigeria.  
January, 2022 - July, 2022.

**Skills:** Vuejs, Quasar, VueX, Reactjs, Typescript, Node.js, Express and MongoDB.

- Caused a 10% increase in the size of the engineering team and a 5% increase in the overall productivity of the engineering team by training, mentoring and leading a team of 7 interns in advanced programming and building production-ready applications for a period of 3 months that ended up in.

**STED Technologies**

Frontend and Mobile Engineer - Full time

Kaduna state, Nigeria.  
March, 2019 - December, 2021.

**Skills:** Reactjs, Vue js, React Native, and Redux.

- Worked with a team of 5 on company-managed libraries for web and mobile using React and React Native that helped improve developers productivity by about 40%.
- Was responsible for planning, analysis and requirement gathering - using the Software Engineering development lifecycle as a guide - of client software before implementation and development, hence leading to a 50% increase in productivity of the team.
- Actualized and developed a salary disbursement platform that saved the company approximately \$500 monthly that would've been going into bank fees, logistics and third party software.
- Conducted the development and maintenance of a client's e-commerce platform with modern web development technologies like Nextjs, Node.js and MongoDB which generated income of \$2000 over the course of 6 months.

**Dixre Enterprise**

Mobile Development Intern - Part time

Kaduna state, Nigeria.  
September, 2017 - January, 2019.

**Skills:** HTML, CSS, PHP, Reactjs, React Native, and Redux.

- Worked and trained under the CTO in web and mobile development technologies and professional programming best practices.

## Skills and Interests

**Technical Skills:** JavaScript, Typescript, Vuejs, Reactjs, React Native, Node.js, Express MongoDB, Python and Java.

## Projects

### Smartlight

A meter unit purchase and management mobile app built with React Native.

Code: <https://github.com/dondxniel/smartlight-js>

Technologies used: React native, JavaScript.

### Acid UI

React component and animation library and library wrapper.

Code: <https://github.com/dondxniel/acid-ui>

Technologies used: React, Typescript.

### RDLand

A clone of a virtual reality company's website.

Preview: <https://rdland.netlify.app>

Code: <https://github.com/dondxniel/NewRDLand>

Technologies used: React, JavaScript.

### Ecommerce website

An ecommerce website built with vue.js.

Preview: <https://vue-ecomm.netlify.app>

Code: <https://github.com/dondxniel/ecommerce-site>

Technologies used: Vue, Quasar.

### E-Election Management System API

An e-election management system API for Nigerian federal, state and local elections where voting is carried out via USSD and election results are updated in real-time as voting takes place.

Code: <https://github.com/dondxniel/e-voting>

Technologies used: Node.js, MongoDB, Socket.io.

### Ecommerce API

An API for an ecommerce website.

Code: <https://github.com/dondxniel/ecommerce-api>

Technologies used: Node.js, Typescript, MongoDB.

### Interview calendar API.

An interview management scheduler.

Code: <https://github.com/dondxniel/interview-calendar-api>

Technologies used: Node.js, Typescript, LowDB, Docker.
